DIGESTON

PIPERAZINE CITRATE 37%

(Anthelmintic Solution)

Better Health
Better Production
& Better Profitability

DIGESTON

PIPERAZINE CITRATE 37%

(Anthelmintic Solution)

Composition:

Each Liter Contains of Piperazine base as Citrate 369 gm Mode of Action:

DIGESTON is a reliable and efficacious preparation for the therapy and control of ascaridosis in all animal species. It is effective against all development stages of ascarides in the intestines of animals. It is also active against oxyurids, some strongyli, Oesophagostomum spp. and Capillaria spp.

DIGESTON paralyses the parasites, which are then by peristaltic movements expelled from the intestines.

Indication:

For the treatment of ascaridosis in all animal species, oxyuriasis and strongyliasis in horses, oesophagostomiasis in pigs, calves and sheep.

Administration & Dosage:

DIGESTON is administered to animals either mixed with feed or added to drinking water. Water and feed should be withdrawn for 2 hours prior to administration of the drug. In case of severe parasite infestation, it is advisable to repeat the treatment after 8-14 days.

Poultry:

1 to 6 weeks: 35ml in 2.5 liters of drinking water for 100 birds.

Over 6 weeks: 70ml in 4-8 liters of drinking water for 100 birds.

As piperazine is non-toxic, the treatment may be repeated without any risk.

Withdrawal Period:

Poultry & large animals may be slaughtered for human consumption only after 36 hours from the last treatment. Milk for human consumption may be taken after 24 hours.

Storage:

Store at cool and dry place.
Keep away from sunlight.
Keep out of the reach of children.
Packing:

100ml, 1 lit., 5 lit. 30 lit.
